TECHNICAL SKILLS

Programing Languages

- C#
- JavaScript / TypeScript
- SQL
- Go/Golang

Frontend

- React
- Next.js 16
- App Router
- Ionic
- Tailwind CSS
- Shadcn/UI
- Bootstrap

Backend & Data

- ASP.NET Core
- Entity Framework Core
- SQL Server
- Node.js
- TypeORM
- Postgres
- MongoDB
- Redis
- RabbitMQ

Product, Analytics & Integrations

- PostHog
- Semrush
- Notion API (as a CMS)
- Google Cloud (OAuth, GDrive api)
- Canva Api

DevOps & Tooling

- Git
- Azure DevOps
- CI/CD
- Docker
- Vercel
- XUnit
- Postman
- Resend

Payments & SaaS Platf.

- Lemon Squeezy

LANGUAGES

- Spanish (Native)
- English (C1)

PROFESSIONAL PROFILE

Senior Full Stack Engineer with 7+ years of experience building web products, APIs, and production systems with .NET, React, TypeScript, and cloud technologies. I enjoy working close to the product, understanding how people use what we build, and turning complex problems into simpler, faster, and more maintainable experiences. I've worked on high-traffic platforms, legacy system modernization, and my own SaaS products, always with a focus on learning, iterating, and shipping software that creates real impact.

PROFESSIONAL EXPERIENCE

Fortem Dev Services LTDA

Senior Full Stack Developer / Software Engineer (Remote)

Jul 2023 - Jun 2026 | San José, Costa Rica

- Built and optimized betting-line generation and caching pipelines used by sportsbook applications, improving data availability and reducing repeated processing.
- Tuned .NET memory usage across the managed heap, generations, and LOH to reduce fragmentation and stabilize memory-heavy line-generation workloads.
- Reduced Player-side processing from ~20 minutes to 2–3 seconds by redesigning SQL Server lookup logic with table-driven values and optimized stored procedures.
- Built production services with ASP.NET Core, SQL Server, Redis, SignalR, and RabbitMQ for real-time betting and asynchronous data workflows.
- Delivered a Vue.js feature-based mapping tool for normalizing external sports/league provider data into internal sportsbook nomenclature.

Presidencia de la República Dominicana - Programa Supérate

Software Developer

Nov 2021 - Jun 2023 | Santo Domingo, Dominican Republic

- Shipped national eligibility portals handling 200K–300K+ traffic spikes shortly after launch, helping citizens verify access to government benefit programs across the Dominican Republic.
- Modernized some modules developed with ASP.NET MVC 5 modules into React + Vite, reducing coupling and improving iteration speed across field operations, training, correspondence, and agreements.
- Built offline-first workflows for 125 field agents nationwide, enabling data capture and sync in low-connectivity environments.
- Developed a Node.js / Express / TypeScript API integrated with Ionic for photo evidence and digital signature capture, reducing paper-based verification work.
- Restructured and migrated legacy, poorly normalized data into cleaner relational schemas, improving reporting, consistency, and maintainability.
- Delivered multiple high-traffic React + Node.js public portals for eligibility checks related to *Supérate*, *Bono de Emergencia*, *Bono Madre*, and *La Brisita Navideña*.

Presidencia de la República Dominicana - Progresando con Solidaridad (PROSOLI)

Junior Developer

Jul 2019 - Nov 2021 | Santo Domingo, República Dominicana

- Developed and maintained internal applications, APIs, modules, and reports using .NET, C#, SQL Server, Angular, jQuery, and Razor.
- Debugged production issues, implemented fixes, and delivered new functionality based on user

COURSES

- ReactiveX - RxJS from Scratch (Udemy), 2022.
- Node: De cero a Experto, Fernando Herrera (Udemy), 2022.
- SOLID Principles of Object-Oriented Design and Architecture, Vasiliy Zukanov (Udemy).

LINKS

- Blog: blog.kevinhernandez.work
- Qiknest: qiknest.com
- Qiknest Journal: news.qiknest.com

and operational needs.

- Worked with SQL Server queries, stored procedures, views, and relational data structures for internal business workflows.
- Supported CI/CD delivery with Azure DevOps across development, testing, and production environments.

ED2 Partners & Brothers

Ionic Developer

Oct 2017 - Nov 2018 | Santo Domingo, República Dominicana

- Developed the Workbify mobile application using Ionic 2, Angular, MySQL, and REST APIs.
- Built mobile UI flows and integrated backend services for early product features.
- Worked with relational data and API-driven functionality across the mobile application.

PROJECTS

Qiknest | Qiknest.com

- Built a modular business workspace for websites, CRM/leads, store workflows, data import, KPI dashboards, and workspace-scoped business operations.
- Designed multitenant product architecture with Supabase and PostgreSQL, focusing on reusable workflows, workspace isolation, and scalable production UI patterns.
- Built and launched Qiknest Journal with Next.js, TypeScript, App Router, Notion CMS, dynamic routes, public content APIs, SEO metadata, sitemap, RSS, robots, and JSON-LD.

Finalroom | Finalroom.app

- Built and shipped a multitenant client portal SaaS for onboarding, agreements, milestones, documents, deliverables, payments, and client-facing project workflows.
- Designed secure workspace isolation and provider integrations using Supabase Auth, PostgreSQL RLS, signed URLs, Edge Functions, Google OAuth/Drive, Notion, PostHog, Sentry, Semrush, and encrypted OAuth tokens.
- Delivered production-ready SaaS flows including responsive UI, billing/usage controls with Lemon Squeezy, tokenized client access, dashboards, deep links, and Vercel deployment.

ACADEMIC EXPERIENCE

Licenciado en Informática / CS Bachelor's Degree

Universidad Autónoma de Santo Domingo | 2014 – 2024
